

CARDIAC SCIENCE

POWERHEART® AED G3 PLUS

AT THE HEART OF
SAVING LIVES™

YOUR AED IS READY, ARE YOU?

When a sudden cardiac arrest (SCA) strikes, the first few minutes are critical to survival. In the chaos and confusion surrounding the event, it can be challenging for the average rescuer, with only minimal training in CPR and AED use, to remember and follow the correct procedures. It's during these critical minutes that the Powerheart AED G3 Plus becomes priceless.

WE'RE RIGHT HERE, TAKING YOU THROUGH EACH LIFE-SAVING STEP

A person is down and the clock is ticking. Fortunately, you've got the G3 Plus featuring our exclusive Rescue Coach™ intuitive voice prompts to put you in control from the moment you open the case. The clear yet extensive prompts take you step-by-step through the rescue process, removing any guesswork. Prompts are spoken in a bold, authoritative voice to help you stay calm and focused in a potentially loud rescue environment and are also displayed on a text screen for users who may be hearing impaired. The built-in metronome then guides you in performing CPR compressions and rescue breaths at the proper pace.

RESCUE COACH VOICE PROMPTS PUT YOU IN CONTROL.

Extensive prompts coach you through AED use...

- *Stay calm. Follow these voice instructions.*
- *Make sure 911 is called now.*
- *Begin by exposing patient's bare chest and torso. Remove or cut clothing if needed.*
- *When patient's chest and torso are exposed, remove square foil package from lid of AED.*
- *Tear open foil package across dotted line and remove pads.*
- *Next, separate one of the white pads completely from blue plastic liner. Begin peeling from the tabbed corner.*
- *Firmly place the pad without the liner on the patient exactly as illustrated. This pad can be placed on either of the two locations shown.*
- *Next, peel the blue plastic liner off of the second white pad.*
- *Firmly place the second pad on the opposite location exactly as illustrated.*
- *Do not touch patient, analyzing heart rhythm. Please wait.*
- *Preparing shock. Move away from the patient.*
- *Shock will be delivered in 3, 2, 1 – shock delivered.*
- *It is now safe to touch the patient.*

... And through CPR

- *When instructed, give patient 30 rapid compressions, then give two breaths.*
- *Place heel of one hand on center of chest between nipples.*
- *Place heel of other hand directly on top of first hand.*
- *Lean over patient with elbows straight.*
- *Press the patient's chest down rapidly – 1/3rd depth of chest – then release.*
- *Start CPR*

RELY ON THE LIFE-SAVING FEATURES OF THE G3 PLUS:

- AHA/ERC 2005 Guidelines consistent
- Extensive Rescue Coach™ intuitive voice prompts
- Metronome for proper CPR compression and rescue breath pacing
- Fully automatic operation – delivers life saving therapy without pushing a shock button
- Patented Rescue Ready® daily automated self-testing of all critical components: battery, pads and electronic systems
- Incorporates the same full, escalating STAR biphasic waveform defibrillation technology and analysis software as our professional responder devices
- 7-year AED warranty
- 4-year full replacement battery warranty

To learn more about the Powerheart AED G3 Plus and our full line of AED devices, visit us at www.cardiacscience.com or call us at 1-800-991-5465.

AUTOMATED CARE FOR PATIENTS MEANS MORE CONFIDENCE FOR YOU.

The G3 Plus is available with fully automatic operation, so you don't have to push a shock button to initiate life-saving therapy on adults or children. When it's time to administer CPR, this new device guides you through steps of CPR, including a metronome for proper timing of chest compressions and rescue breaths. Together they help ensure the patient receives the proper care at the proper time, helping to minimize your own stress as you take charge of the event.

BUILT TO SAVE LIVES. BUILT TO LAST.

Hopefully you will never need to use your Powerheart AED G3 Plus. But if you do, rest assured it will be ready when you need it. Our patented Rescue Ready technology tests all critical components such as battery, pads and electronic systems daily, weekly and monthly to make sure they are working properly. Cardiac Science sets the standard in AED reliability and is backed by its industry leading seven-year device and four-year battery warranties.

POWERHEART®

SPECIFICATIONS

DEFIBRILLATOR

Operation	9390A Automatic – <i>Also available in semi-automatic mode. Please consult with your sales representative.</i>
Waveform	Biphasic truncated exponential
Energy (J) range available	Escalating Variable Energy (VE) 150J to 360J
Protocols	5 energy protocols available
Factory default (Nominal)	200VE, 300VE, 300VE
Voice prompts	Rescue Coach™ voice instructions guide user confidently through rescue process
CPR Cadence	Metronome sound for compression frequency
Text screen	Displays written instructions to guide user through rescue process
Visible indicators	RescueReady Status Indicator, SmartGauge Battery Status Indicator, Service Indicator, Pad Indicator, Text Display
Audible alerts	Voice Prompt, System Alert
Synchronized shock	Built in automatic synchronization feature
Pacemaker pulse detection	Yes
Programmable	Yes, via MDLink®
Pediatric capability	Yes

PADS

Minimum combined surface area	228cm ²
Extended length of lead wire	1.3m
Supplied Type	Self-checking, pre-connected to the AED Adult, pre-gelled, self-adhesive, disposable, non-polarized (identical pads can be placed in either position) defibrillation pads
Shelf life	2 years

BATTERY

Type	IntelliSense® lithium battery
Warranty	4 year, full operational replacement

AUTOMATIC SELF-TESTS

Daily	Battery, pads (presence and function), internal electronics, no energy charge, SHOCK/CONTINUE button, and software
Weekly	Battery, pads (presence and function), internal electronics, partial energy charge, SHOCK/CONTINUE button, and software
Monthly	Battery, pads (presence and function), internal electronics, full energy charge cycle, SHOCK/CONTINUE button, and software

EVENT DOCUMENTATION

Type	Internal memory
Internal memory	60 minutes ECG data with event annotation, multiple rescue functionality
ECG Playback Communications	Viewable via RescueLink® software via PC Serial port or USB (via adapter) for PC with Windows
Clock synchronization	Rescue event time stamp of event data

PHYSICAL DIMENSIONS

Height	8 cm (3.3 in)
Width	27 cm (10.6 in)
Depth	31 cm (12.4 in)
Weight	3.10 kg (6.6 lb)

MODEL NUMBERS

9390A-501 Powerheart AED G3 Plus Automatic with 2005 AHA/ERC Guidelines Protocols
9390E-501 Powerheart AED G3 Plus Semi-Automatic with 2005 AHA/ERC Guidelines Protocols

Each AED package includes (1) defibrillator, (1) IntelliSense battery (9146), (1) pair of defibrillation pads, and (1) Quick Start Tool Kit which includes CD-Rom with AED Manual, Training Video, RescueLink and MDLink, and serial communication cable.
